Commercial Settlement Co 

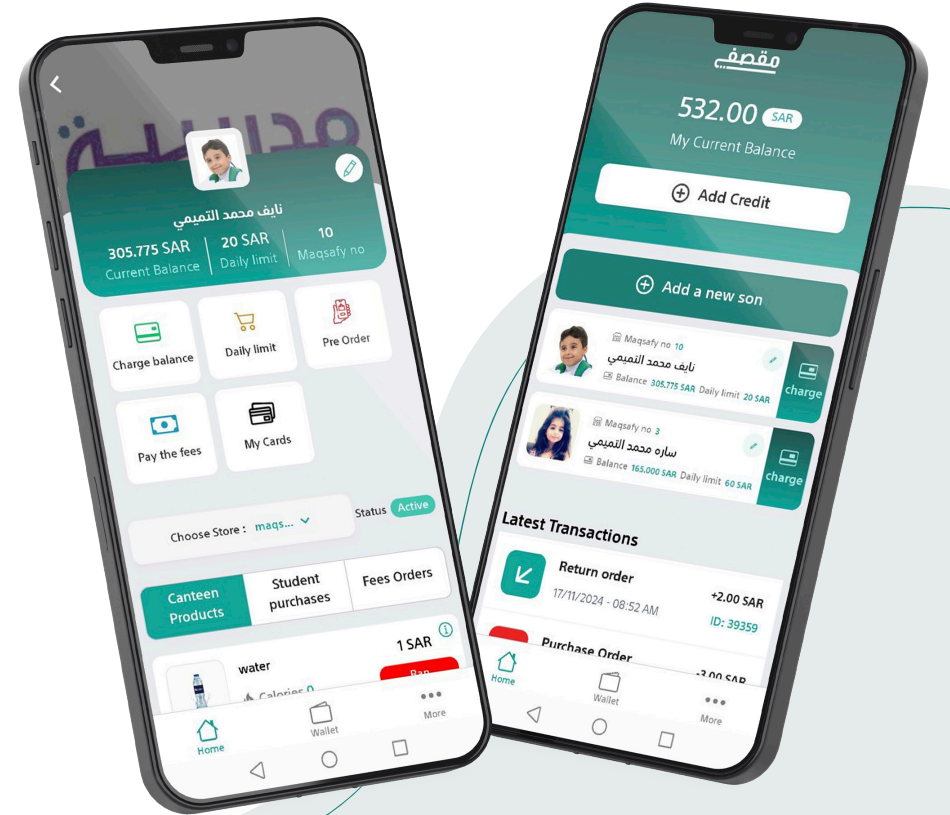

Introduction

Due to the rapid technological advancements and the increasing importance of digital transformation, which is one of the pillars of the 2030 vision. For that, modern technological solutions have become essential to enhance efficiency and improve user experience. From this point, “Maqsafy” becomes the main partner in the digital transformation journey of the educational sector. We provide a comprehensive platform to facilitate educational institutions' buying and selling process. It's our pleasure to be an essential part of this digital journey, to build a special digital future for the educational sector.

About us

Commercial Settlement Company (Closed Joint Stock Company) is a Saudi company operating in the field of developing electronic payment systems. It was established by the regulations in force in the Kingdom of Saudi Arabia, and its address is: Prince Mohammed bin Saad bin Abdulaziz Road; Al Malqa District, Riyadh.

The idea

Regulation of the sales process in canteens electronically by enabling students to use E-wallets and they can pay fees from their bracelet or the card. For parents, they can make these E-wallets. They can charge and divide the credit of the students to a daily limit easily. They can also prevent any unsuitable products for the student's health, ensuring a flexible and safe experience that meets everyone's needs.

Our main goal

The project aims to empower students by Enabling them to manage their daily balance. Giving parents greater control over their children's balance and checking their purchases. It also enhances transparency within school canteens by reducing reliance on cash and relying on advanced electronic payment systems. Additionally, the project supports the digital transformation process in schools by developing infrastructure and simplifying financial operations, which enhances efficiency and convenience for all parties involved.

Our Message :

A high level of contribution to the digital transformation process in the educational sector by digitizing the buying and selling processes in canteens.

Our Goal :

Spreading digitization across all schools in the Kingdom of Saudi Arabia through the services we provide, which facilitates the work of all stakeholders involved.

Our Vision :

Enabling the school community to manage school nutrition both financially and healthily through a comprehensive electronic system.

Maqsafy's advantages

Maqsafy offers multiple advantages from various perspectives

Side 01

The suppliers and
the Canteen's.
Operators.

Side 02

The school and the
Ministry of.
Education side.

Side 03

04

The parent and the student side

Maqsafy's account

Parent's account

it allows parents to add balance to their wallets and add their children. They can charge and divide their credit to a daily limit. They can also block any of their products and check their daily purchases. Parents can also order their child's meal from home using the pre-order feature, in addition to paying school fees through electronic wallets.

Student's account

it allows the student to view his account and the limit the parent allocates. The student can also check the canteen's products. Additionally creating the student's account is through 2 ways: self-registration or from the parent's account. Students can also order their meals from home using the pre-order feature.

School's account

It allows the school administration to add canteens, create accounts for sellers, see registered students, add students who can't log in, and help them transfer the daily limit after charging their wallets. In addition to receiving school fees through electronic wallets.

Educational Staff Account

This account enables the educational staff to view canteen products and make purchases through the pre-order feature. The educational staff account can be created through self-registration or from the school's account. Additionally, they can benefit from the "Maqsafy Loyalty" program to receive advantages such as commercial and service benefits.

Canteen's account

it allows the canteen's manager to add his products, sell and receive money from student's wallets online. Additionally creating the canteen's account is through the school's account. Additionally enabling them to order from suppliers for daily product delivery to their canteen.
